## ABOUT THE CONFERENCE

In the light of the progress and development of the SOLARIS National Synchrotron Radiation Centre, we are organizing the fourth edition of the international conference "Joint Meeting of Polish Synchrotron Radiation Society and SOLARIS Centre Users". The meeting brings together scientists from the SOLARIS synchrotron and scientists from the Polish Synchrotron Radiation Society. The aim of the conference is to integrate and consolidate the community of synchrotron radiation users at the SOLARIS synchrotron. For this reason, the conference will be organised jointly by the SOLARIS National Synchrotron Radiation Centre and the Polish Synchrotron Radiation Society.

The conference will enable the exchange of knowledge and experience in the field of scientific research using the synchrotron radiation. The topics of the conference will cover almost all areas of science, from physics, through biology, chemistry, geology and environmental engineering. The conference will provide an excellent opportunity to discuss concepts of new experimental beamlines and to exchange ideas related to scientific projects that can be implemented on the currently launched and operating SOLARIS beamlines.
