

Symposium Sylinda

Friday, 8 March 2024

Session 2: FDMNES ab initio calculations of XANES spectra at the K- absorption edges of 3d metals and L2,3-edges of heavier elements and application to spectra in the tender energy range (11:50 - 12:35)

-Conveners: Yves Joly

Session 2: Structural modelling, mechanistic studies and structure performance relationships from operando data using advanced data analysis methodologies including machine learning (12:35 - 13:20)

-Conveners: Janis Timoshenko
